

AEROHAWX TEACHER ENABLEMENT

Teacher Operations Guide

Professional walkthrough of the complete teacher workflow: dashboard navigation, publishing, content requests, student query handling, progress tracking, and roster management.

Audience: Teachers

Format: Step-by-step with annotated snips

Prepared for classroom rollout

SLIDE 1

Teacher Dashboard Orientation

- Use the notification bell to monitor student alerts and query activity.
- Use the menu button for quick access to all teacher actions.
- Apply grade and subject filters before assigning or reviewing activities.
- Each activity card gives status visibility plus one-click launch.

Recommended daily start: open bell -> open menu -> review active modules.

Teacher Quick Menu

- **Raise a Request:** Ask admin for VR simulations or drone activities.
- **Student Progress:** Check completion status and attempts by module.
- **Student Queries:** Open and respond to learner doubts.
- **Registered Students:** View the teacher-matched roster.

Keep this as the primary command center for teacher operations.

SLIDE 3

Activity Cards: Publish + Launch

- Use **Publish** to make a module visible to students.
- Use **Unpublish** when a module needs revision before class.
- Use **Show activity/code** to open execution assets and instructions.
- Use status chips to verify visibility state before assigning work.

Best practice: publish only validated modules one day before class to avoid confusion.

SLIDE 4

Raise Content Requests to Admin

- Select request type: **VR simulation** or **Drone activity**.
- For VR, select required modules or choose **Any other**.
- Add required date and context notes for curriculum alignment.
- Submit using **Send to Admin**.

Scheduling rule: custom/Any-other VR requests require longer lead time than standard module requests.

Teacher Walkthrough Snip

1 Choose VR or drone request mode

TEACHER REQUEST

Request content

Pick what you need.

Close

VR simulations

Select ready-made VR labs by topic.

Drone activity

Describe a concept to deliver with drones.

2 Select modules or Any other

VR simulations

☐ Classification of Forces (I, II)

☐ Factors Affecting Resistance of Conductor (Length, Area, Material)

☐ Heating Effect of Electric Current & Applications

☐ Newton's First Law of Motion

☐ Pressure in Solids, Liquids & Pressure at Work

☐ Refractive Index & Snell's Law

☐ Resistance of Resistors (Series & Parallel)

☐ Testing

☐ Understanding Archimedes' Principle

☐ Understanding Kepler's Law

3 Set date + notes for admin

Needed by

dd-mm-yyyy

Select a date at least 3 days from today (next 2 days are blocked).

Extra notes (optional)

Describe what you need added or any context for admin.

Cancel

Send to Admin

4 Submit request to admin

SLIDE 5

Notifications and Query Alerts

- Open bell icon to access notification center.
- Use **Student Queries** shortcut for direct jump to inbox.
- Review unread badges and clear items as needed.

Check this panel before each class and at day-end for quick SLA response.

SLIDE 9

Daily Operating Checklist

Before Class

- Review unread notifications and student queries.
- Verify required modules are in Published state.
- Open activity/code for the first session run-through.

During Class

- Use module cards to launch activities quickly.
- Mark issues and collect missing-content needs.
- Use query inbox for immediate support follow-ups.

After Class

- Open Student Progress and review submissions.
- Send reminders to pending students.
- Raise admin requests for next class improvements.

Weekly Governance

- Audit roster on Registered Students page.
- Re-check publish state for upcoming modules.

- Archive unresolved queries for escalation.
